Zach Held

Mobile: (314) 805 - 3201 | Email: ztheld@gmail.com

Technical Skills

- Python
- Java
- HTML
- CSS

- Git Version Control
- Agile
- phpMyAdmin
- MySQL

- Spring Boot Framework
- Flask Framework
- Intellij IDE
- VisualStudio Code

Education

- LaunchCode - LC101 Graduate 2018
- St. Louis Community College - Associates Degree 2015

Projects

All Projects Located In My Github Repositories - https://github.com/zachtheld

Liftoff-Capstone (Java, HTML, CSS, MySQL, ThymeLeaf)

- With the knowledge acquired through LaunchCode's LC101 I am building an application for my capstone project. My application is for my dog sitting business. Users will be able to sign up, login, view scheduled appointments, message me about future appointments and leave reviews.

Build-A-Blog (Python, Flask, MySQL, phpMyAdmin, HTML./CSS)

- For this project I was tasked with creating a blog where users can make a post including a title and body. Along with creating new blog posts a user can view previous entries. This application also includes navigation to seamlessly explore the application.

Blogz (Python, Flask, MySQL, phpMyAdmin, HTML/CSS)

- This project extends the Build-A-Blog project and improves on the functionality of the application. The new features include user registration, login, creation of user sessions and verification on inputs. Each users blog entry is stored in in a MySQL database and linked to that specific user.

Experience

Student - LaunchCode   January 2018 - Present

- Intensive 20-week code bootcamp - LC101
- Dedicated time per week: 20 hours coursework, 6 hours lecture, 10-15 hours assignments
- Continuing education through LaunchCode's Liftoff program

Work - Urban Chestnut Brewing Company   July 2015 - September 2016

- Keg Operations Manager
- Inventory and daily production projection
- Operation and inspections of the keg machine
- Left September 2016 due to physical health reasons

Work - NuWay Inc.   March 2014 - July 2015

- Showroom Sales

- Provided product information and demonstration to customers
- Inventory transfers and inspections

Work - Wyoming Conservation Corps   Summer 2012 & 2013 May - August

- Forest reclamation
- Hiking/Mountain Biking trail maintenance
- Forest thinning and cleanup for wildfire prevention
- Traveled the state with a team of 10 crew members
